8. EXPOSURE CONTROLS/PERSONAL PROTECTION		

#### **Control parameters**

**Exposure Limits** No value assigned for this specific material by Safe Work Australia.

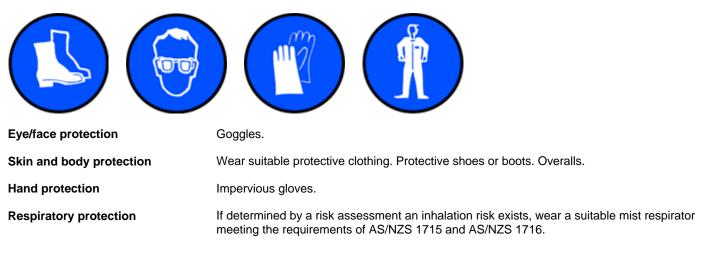

#### Appropriate engineering controls

Engineering controlsApply technical measures to comply with the occupational exposure limits.If in the handling and application of this material, safe exposure levels could be exceeded,<br/>the use of engineering controls such as local exhaust ventilation must be considered and<br/>the results documented. If achieving safe exposure levels does not require engineering<br/>controls, then a detailed and documented risk assessment using the relevant Personal<br/>Protective Equipment (PPE) (refer to PPE section below) as a basis must be carried out to<br/>determine the minimum PPE requirements.

#### Individual protection measures, such as personal protective equipment

The selection of PPE is dependent on a detailed risk assessment. The risk assessment should consider the work situation, the physical form of the chemical, the handling methods, and environmental factors.
