#### **Control parameters**

**Exposure Limits** 

No value assigned for this specific material by Safe Work Australia.

#### Appropriate engineering controls

Apply technical measures to comply with the occupational exposure limits. **Engineering controls** If in the handling and application of this material, safe exposure levels could be exceeded, the use of engineering controls such as local exhaust ventilation must be considered and the results documented. If achieving safe exposure levels does not require engineering controls, then a detailed and documented risk assessment using the relevant Personal Protective Equipment (PPE) (refer to PPE section below) as a basis must be carried out to determine the minimum PPE requirements.

#### Individual protection measures, such as personal protective equipment

The selection of PPE is dependent on a detailed risk assessment. The risk assessment should consider the work situation, the physical form of the chemical, the handling methods, and environmental factors.

#### OVERALLS, SAFETY SHOES, SAFETY GLASSES, GLOVES.
