SAFETY DATA SHEET

Revision date: 11-Jun-2024

Revision Number 2

Section 1: Identification	
Product identifier	
Product Name	APTALON W8030
Product Code(s)	00000053627
Other means of identification	
Recommended use of the chemical	and restrictions on use
Recommended use	Polyurethane dispersion. Architectural.
Uses advised against	No information available.
Details of manufacturer or importer	<u>-</u>
Supplier IXOM Operations Pty Ltd ABN: 51 600 546 512 Level 8, 1 Nicholson Street Melbourne 3000 Australia	
Telephone Number: +61 3 9906 3000	
Emergency telephone number	
Emergency telephone number	1 800 033 111 (ALL HOURS)
Please ensure you refer to the limitations of this	Safety Data Sheet as set out in the "Other Information" section at the end of this Data Sheet.
Section 2: Hazard identific	ation
	in accordance with the criteria of Safe Work Australia - Globally Harmonized System (GHS). y the criteria of the Australian Dangerous Goods Code (ADG Code) for transport by Road and
GHS Classification	

Skin corrosion/irritation	Category 2
Serious eye damage/eye irritation	Category 2
Skin sensitization	Category 1

Signal word WARNING

Hazard statements

H315 - Causes skin irritation H317 - May cause an allergic skin reaction H319 - Causes serious eye irritation

Precautionary Statements - Prevention

Avoid breathing dust/fume/gas/mist/vapors/spray. Wash face, hands and any exposed skin thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves/clothing and eye/face protection.

Precautionary Statements - Response

Specific treatment (see First aid on this SDS). IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

IF ON SKIN: Wash with plenty of soap and water.

If skin irritation or rash occurs: Get medical advice/attention.

Take off contaminated clothing and wash before reuse.

Wash contaminated clothing before reuse.

Precautionary Statements - Storage

No storage statements.

Precautionary Statements - Disposal

Dispose of contents/container in accordance with local, regional, national, and international regulations as applicable.

Other hazards which do not result in classification

Toxic to aquatic life. Harmful to aquatic life with long lasting effects.

Section 3: Composition and information on ingredients

Chemical name	CAS No.	Weight-%
Triethylamine	121-44-8	0.5-1%
Adipic acid dihydrazide	1071-93-8	0.1-0.5%
Non hazardous component(s)	-	to 100%

Section 4: First aid measures

Description of first aid measures

General advice	For advice, contact a Poisons Information Centre (e.g. phone Australia 13 11 26; New Zealand 0800 764 766) or a doctor.
Inhalation	IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing. (Call a physician if symptoms occur).
Eye contact	Rinse thoroughly with plenty of water for at least 15 minutes, lifting lower and upper eyelids. Consult a physician.
Skin contact	Wash skin with soap and water. Get medical attention immediately if symptoms occur.
Ingestion	Clean mouth with water and drink afterwards plenty of water. Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention if symptoms occur.

Most important symptoms and effects, both acute and delayed

Symptoms	Irritation/Corrosion. May cause redness and tearing of the eyes. Erythema (skin redness). May cause allergic skin reaction. Rashes. Hives.	
Effects of Exposure	No information available.	
Indication of any immediate medical attention and special treatment needed		
Note to physicians	Treat symptomatically. May cause sensitization by skin contact.	

Section 5: Firefighting measures

Suitable Extinguishing Media		
Suitable extinguishing media	Dry chemical, CO2, water spray or regular foam.	
Unsuitable extinguishing media	Not determined.	
Specific hazards arising from the chemical		
Specific hazards arising from the chemical	Not combustible, however following evaporation of the water component of the material, the residual material can burn if ignited. Sealed containers may rupture when heated.	
Special protective actions for fire-fighters		
Special protective equipment and precautions for fire-fighters	Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear. Use personal protection equipment.	

Section 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures

Personal precautions	Avoid contact with skin, eyes and inhalation of vapors. Do not touch or walk through spilled material. Stop leak if you can do it without risk. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Use personal protective equipment as required. Wash thoroughly after handling.	
For emergency responders	Use personal protection recommended in Section 8.	
Environmental precautions		
Environmental precautions	See Section 12 for additional Ecological Information.	
Methods and material for containment and cleaning up		
Methods for containment	Prevent further leakage or spillage if safe to do so.	
Methods for cleaning up	Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. After cleaning, flush away traces with water.	

Section 7: Handling and storage

Precautions for safe handling

Advice on safe handling	Avoid contact with skin and eyes. Avoid breathing vapors or mists. Use personal protection equipment. Wash thoroughly after handling. Minimize contact with air to reduce contamination with mould, fungus, or other organisms which could cause decomposition or spoilage. Stir well before use.	
Conditions for safe storage, including any incompatibilities		
Storage Conditions	Keep containers tightly closed in a dry, cool and well-ventilated place. Keep from freezing. Keep container closed when not in use.	

Incompatible materials Acidic conditions will cause the polymer to precipitate out of solution.

Section 8: Exposure controls and personal protection

Control parameters

Exposure Limits

No value assigned for this specific material by Safe Work Australia. However, Workplace Exposure Standard(s) for constituent(s):

Chemical name	Australia	New Zealand	ACGIH TLV
Triethylamine	TWA: 2 ppm	TWA: 3 ppm	TWA: 0.5 ppm
121-44-8	TWA: 8 mg/m ³	TWA: 12 mg/m ³	STEL: 1 ppm
	STEL: 4 ppm	STEL: 5 ppm	Sk*
	STEL: 17 mg/m ³	STEL: 20 mg/m ³	
	_	Sk*	

Chemical name	European Union	United Kingdom	Germany DFG
Triethylamine	TWA: 2 ppm	TWA: 2 ppm	TWA: 1 ppm
121-44-8	TWA: 8.4 mg/m ³	TWA: 8 mg/m ³	TWA: 4.2 mg/m ³
	STEL: 3 ppm	STEL: 4 ppm	Peak: 2 ppm
	STEL: 12.6 mg/m ³	STEL: 17 mg/m ³	Peak: 8.4 mg/m ³
	*	Sk*	_

As published by Safe Work Australia Workplace Exposure Standards for Airborne Contaminants.

TWA - The time-weighted average airborne concentration of a particular substance when calculated over an eight-hour working day, for a five-day working week.

STEL (Short Term Exposure Limit) - the airborne concentration of a particular substance calculated as a time-weighted average over 15 minutes, which should not be exceeded at any time during a normal eight hour work day. According to current knowledge this concentration should neither impair the health of, nor cause undue discomfort to, nearly all workers.

These Workplace Exposure Standards are guides to be used in the control of occupational health hazards. All atmospheric contamination should be kept to as low a level as is workable. These workplace exposure standards should not be used as fine dividing lines between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.

Appropriate engineering controls

Engineering controls Apply technical measures to comply with the occupational exposure limits.

If in the handling and application of this material, safe exposure levels could be exceeded, the use of engineering controls such as local exhaust ventilation must be considered and the results documented. If achieving safe exposure levels does not require engineering controls, then a detailed and documented risk assessment using the relevant Personal Protective Equipment (PPE) (refer to PPE section below) as a basis must be carried out to determine the minimum PPE requirements.

Individual protection measures, such as personal protective equipment

The selection of PPE is dependent on a detailed risk assessment. The risk assessment should consider the work situation, the

physical form of the chemical, the handling methods, and environmental factors.

OVERALLS, SAFETY SHOES, CHEMICAL GOGGLES, GLOVES.

Eye/face protection	Goggles.
Skin and body protection	Boots. Impervious clothing. Overalls.
Hand protection	Impervious gloves.
Respiratory protection	If determined by a risk assessment an inhalation risk exists, wear a suitable mist respirator meeting the requirements of AS/NZS 1715 and AS/NZS 1716.
Environmental exposure controls	No information available.
Thermal hazards	No information available.

Section 9: Physical and chemical properties

Information on basic physical and chemical properties

Physical state Appearance Color Odor Odor threshold	Liquid Dispersion White Odourless No information available	
Property_	Values_	Remarks • Method
pH	6.5-8.5 (100%)	None known
pH (as aqueous solution)	No data available	None known
Melting point / freezing point	No data available	None known
Boiling point / boiling range	No data available	None known
Flash point	Not applicable	None known
Evaporation rate	No data available	None known
Flammability (solid, gas)	No data available	None known
Flammability Limit in Air		None known
Upper flammability or explosive	No data available	
limits		
Lower flammability or explosive	No data available	
limits		
Vapor pressure	No data available	None known
Vapor density	No data available	None known
Relative density	1.0 @25°C	None known
Water solubility	Miscible in water	None known
Solubility(ies)	No data available	None known
Partition coefficient	No data available	None known
Autoignition temperature	No data available	None known
Decomposition temperature	No data available	None known
Kinematic viscosity	No data available	None known
Dynamic viscosity	No data available	None known

Other information

Section 10: Stability and reactivity

Reactivity	
Reactivity	No information available.
Chemical stability	
Stability	Stable under normal conditions.
Explosion data Sensitivity to mechanical impact Sensitivity to static discharge	None.
Possibility of hazardous reactions	
Possibility of hazardous reactions	None under normal processing.
Conditions to avoid	
Conditions to avoid	Do not freeze.
Incompatible materials	
Incompatible materials	Acidic conditions will cause the polymer to precipitate out of solution.
Hazardous decomposition products	

Hazardous decomposition products Hydrogen chloride. Chlorine. Isocyanates. Hydrogen cyanide.

Section 11: Toxicological information

Information on likely routes of exposure

Product Information	No adverse health effects expected if the chemical is handled in accordance with this Safety Data Sheet and the chemical label. Symptoms or effects that may arise if the chemical is mishandled and overexposure occurs are:
Inhalation	May cause irritation.
Eye contact	Causes serious eye irritation.
Skin contact	Irritating to skin. May cause sensitization by skin contact.
Ingestion	Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.
Symptoms	Irritation/Corrosion. May cause redness and tearing of the eyes. Erythema (skin redness). May cause allergic skin reaction. Rashes. Hives.

Acute toxicity_.

<u>Numerical measures of toxicity</u> - Product Information No information available

Component Information			
Chemical name	Oral LD50	Dermal LD50	Inhalation LC50

Triethylamine	= 460 mg/kg (Rat)	= 415 mg/kg (Rabbit)	= 14.5 mg/L (Rat)1 h		
Adipic acid dihydrazide	-	-	> 5.3 mg/L (Rat)4 h		
See section 16 for terms and abbrevia	tions	•			
Delayed and immediate effects as w	vell as chronic effects from sh	ort and long-term exposure			
			-		
Skin corrosion/irritation	Causes skin irritation.				
Serious eye damage/eye irritation	Causes serious eye irritation.				
Respiratory or skin sensitization	May cause an allergic skin rea	ction.			
	, ,				
Germ cell mutagenicity	No information available.				
Carcinogenicity	No information available.				
Carcinogenicity					
Reproductive toxicity	No information available.				
STOT - single exposure	No information available.				
U 1					
STOT - repeated exposure	No information available.				
Aspiration hazard	No information available.				

Section 12: Ecological information

Ecotoxicity

Aquatic ecotoxicity Keep out of waterways. Toxic to aquatic life. Harmful to aquatic life with long lasting effects.

Chemical name	Algae/aquatic plants	Fish	Toxicity to microorganisms	Crustacea
Triethylamine	-	LC50: =43.7mg/L (96h,	-	EC50: =200mg/L (48h,
		Pimephales promelas)		Daphnia magna)
Adipic acid dihydrazide	_	LC50: >100mg/L (96h,	-	-
		Cyprinus carpio)		

Terrestrial ecotoxicity	There is no data for this product
Persistence and degradability	
Persistence and degradability	No information available.
Bioaccumulative potential	

Bioaccumulation

There is no data for this product.

Component Information

Chemic	al name	Partition coefficient	
Triethylamine		1.45	
Adipic acid dihydrazide		-2.7	
Mobility			
Mobility	No information available.		
Other adverse effects			
Other adverse effects	No information available.		
Section 13: Disposal con	siderations		
Waste treatment methods			
Waste from residues/unused products	Dispose of in accordance with federal, state and local regulations.		
Contaminated packaging	Empty containers should be taken to an approved waste handling site for recycling or disposal.		
See section 8 for more informatio	n		
Section 14: Transport inf	ormation		
ADG_		ods by the criteria of the Australian Dangerous Goods Code ad and Rail; NON-DANGEROUS GOODS.	
IATA		ods by the criteria of the International Air Transport boods Regulations for transport by air; NON-DANGEROUS	

 IMDG
 Not classified as Dangerous Goods by the criteria of the International Maritime Dangerous

 Goods Code (IMDG Code) for transport by sea;
 NON-DANGEROUS GOODS.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code No information available

Section 15: Regulatory information

Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations

<u>Australia</u>

Classified as a hazardous substance in accordance with the criteria of Safe Work Australia - Globally Harmonized System (GHS). Not classified as Dangerous Goods by the criteria of the Australian Dangerous Goods Code (ADG Code) for transport by Road and Rail; NON-DANGEROUS GOODS.

See section 8 for national exposure control parameters

Standard for Uniform Scheduling of Medicines and Poisons (SUSMP)

No poisons schedule number allocated

Poison Schedule Number Not applicable

Disclaimer

This SDS summarises to our best knowledge at the date of issue, the chemical health and safety hazards of the material and general guidance on how to safely handle the material in the workplace. Since IXOM Operations Pty Ltd cannot

anticipate or control the conditions under which the product may be used, each user must, prior to usage, assess and control the risks arising from its use of the material.

If clarification or further information is needed, the user should contact their IXOM representative or IXOM Operations Pty Ltd at the contact details on page 1.

IXOM Operations Pty Ltd's responsibility for the material as sold is subject to the terms and conditions of sale, a copy of which is available upon request.
