Suitable extinguishing media	Dry chemical, CO2, water spray or regular foam.			
Unsuitable extinguishing media	Do not scatter spilled material with high pressure water streams.			
Specific hazards arising from the chemical				
Specific hazards arising from the chemical	Most vapors are heavier than air. Vapors may spread along ground and collect in low or confined areas (sewers, basements, tanks). Flash back possible over considerable distance. Combustible liquid.			
Hazardous combustion products	Carbon oxides.			
Special protective actions for fire-fi	ghters			
Special protective equipment and precautions for fire-fighters	Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear. Use personal protection equipment.

#### Personal precautions, protective equipment and emergency procedures

Personal precautions	Avoid contact with skin and eyes. Avoid breathing vapors or mists. Use personal protectiv equipment as required. Wash thoroughly after handling.			
For emergency responders	Use personal protection recommended in Section 8.			
Environmental precautions				
Environmental precautions	See Section 12 for additional Ecological Information.			
Methods and material for containment and cleaning up				
Methods for containment	Prevent further leakage or spillage if safe to do so.			
Methods for cleaning up	Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. After cleaning, flush away traces with water.			

# Section 7: Handling and storage

### Precautions for safe handling

Advice on safe handling Avoid contact with skin and eyes. Avoid breathing vapors or mists. Use personal protection equipment. Wash thoroughly after handling. Take precautionary measures against static discharges.

#### Conditions for safe storage, including any incompatibilities

**Storage Conditions** Keep in a dry, cool and well-ventilated place. Protect from moisture. Keep container closed when not in use. Store away from sources of heat or ignition. Nitrogen blanket recommended for large tanks (capacity 100m3 or higher). Exposure to nitrogen may cause asphyxiation or death. Personnel must observe strict safety precautions when involved with a confined space entry.

Incompatible materials Strong acids. Oxidizing agents.

# Section 8: Exposure controls and personal protection

#### Control parameters

**Exposure Limits** No value assigned for this specific material by Safe Work Australia.

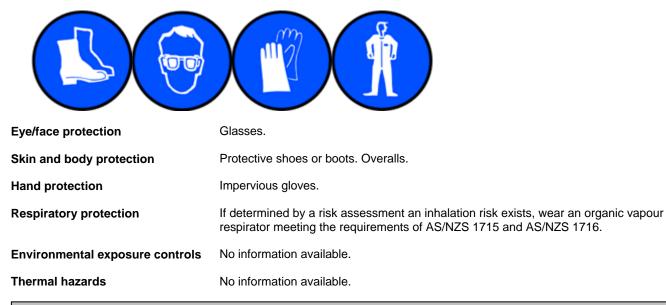

### Appropriate engineering controls

**Engineering controls** Ensure adequate ventilation, especially in confined areas.

#### Individual protection measures, such as personal protective equipment

The selection of PPE is dependent on a detailed risk assessment. The risk assessment should consider the work situation, the physical form of the chemical, the handling methods, and environmental factors.

### OVERALLS, SAFETY SHOES, SAFETY GLASSES, GLOVES.
