SAFETY DATA SHEET

Revision date: 12-Feb-2024

Revision Number 5

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Product identifier			
Product Name	STEEL GRINDING BALLS		
Product Code(s)	00000017804		
Other means of identification			
Recommended use of the chemica	al and restrictions on use		
Recommended use	Ore grinding.		
Uses advised against	No information available		
Details of the supplier of the safety	y data sheet		
<u>Supplier</u> Ixom Operations Pty Ltd (Incorporate NZBN: 9429041465226 Address: 16 Mt Maunganui South New Zealand	ed in Australia) 6 Totara Street		
Telephone Number: +64 9 368 2700 Facsimile: +64 9 368 2710			
For further information, please contact			
Contact Point	Product Safety Department		
Emergency telephone number			
Emergency Telephone	0 800 734 607 (ALL HOURS)		
Please ensure you refer to the limitations of this Safety Data Sheet as set out in the "Other Information" section at the end of this Data Sheet.			
2. HAZARDS IDENTIFICATION			
Not classified as a Dangerous Good under NZS 5433 Transport of Dangerous Goods on Land; NON-DANGEROUS GOODS.			
Based on available information, not classified as hazardous according to criteria in the Hazardous Substances (Hazard Classification) Notice 2020.			
GHS Classification			
Label elements			

Other hazards which do not result in classification

Hazard statements

3. COMPOSITION/INFORMATION ON INGREDIENTS

Mixture

Chemical name	CAS No.	Weight-%
Iron	7439-89-6	95-97
Silicon	7440-21-3	0.15-2
Manganese	7439-96-5	0.3-1.2
Carbon	7440-44-0	0.5-1.1
Other component(s)	-	1-2

4. FIRST AID MEASURES

Description of first aid measures

General advice	For advice, contact a Poisons Information Centre (e.g. phone Australia 13 11 26; New Zealand 0800 764 766) or a doctor.
Emergency telephone number	Poisons Information Center, New Zealand: 0800 764 766 Poisons Information Center, Australia: 13 11 26
Inhalation	Remove to fresh air and keep at rest in a position comfortable for breathing. If symptoms persist, call a physician.
Eye contact	In case of eye contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician if irritation persists.
Skin contact	Wash skin with soap and water. Get medical attention if irritation develops and persists.
Ingestion	Clean mouth with water. Drink 1 or 2 glasses of water. Get medical attention if symptoms occur.

Most important symptoms and effects, both acute and delayed

Symptoms May cause physical irritation to the eyes.

Indication of any immediate medical attention and special treatment needed

Note to physicians Treat symptomatically.

5. FIRE FIGHTING MEASURES			
Suitable Extinguishing Media			
Suitable Extinguishing Media	Use extinguishing agent suitable for type of surrounding fire.		
Unsuitable extinguishing media	None known.		
Specific hazards arising from the o	hemical		
Specific hazards arising from the chemical	Non-combustible.		

Special protective actions for fire-fighters

Special protective equipment for fire-fighters Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear. Use personal protection equipment.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Personal precautions	Avoid contact with skin, eyes, and clothing. Avoid breathing dust or spray mist. Avoid generation of dust. Ensure adequate ventilation. Evacuate personnel to safe areas. Do not touch or walk through spilled material. Use personal protective equipment as required. Wash thoroughly after handling.	
For emergency responders	Clear area of all unprotected personnel. Use personal protection recommended in Section 8.	
Environmental precautions		
Environmental precautions	Prevent further leakage or spillage if safe to do so. Refer to protective measures listed in Sections 7 and 8.	
Methods and material for containm	ent and cleaning up	
Methods for containment	Stop leak if you can do it without risk. Do not touch or walk through spilled material.	
Methods for cleaning up	Use appropriate personal protective equipment (PPE). Carefully shovel or sweep up spille material and place in suitable container. Avoid generating dust.	
Precautions to prevent secondary	hazards	
Prevention of secondary hazards	Clean contaminated objects and areas thoroughly observing environmental regulations.	

7. HANDLING AND STORAGE

Precautions for safe handling

Advice on safe handling Avoid contact with skin, eyes, and clothing. Avoid breathing dust or spray mist. Ensure adequate ventilation. Use personal protection equipment. Wash thoroughly after handling.

POTENTIAL HAZARDS FROM USE

During grinding in a ball mill the mill load (ore and balls) is lifted by the centrifugal action of the mill and the action of the mill liners. Rotational speeds are selected to drop the lifted portion of the charge onto the remaining toe of the charge. The impacts generated by this action crush the ore.

In semi-autogenous grinding in large diameter mills these forces become quite large since the charge falls from considerable height and the balls are typically much larger in diameter and much heavier (up to nearly 15 KG each).

When a cascading ball falls onto a piece of ore, the energy of impact is absorbed in crushing the ore. This cushions the impact so that the ball absorbs only a small proportion of that energy. However if a cascading ball falls onto the mill liners or onto another ball the

	energy is not dissipated by the work required for crushing, but is mostly absorbed within the metal - mostly in elastic and plastic deformation with some loss to heat and noise. Plastic deformation of grinding balls causes the steel structures to work harden.
	Typically, in a well-managed milling operation where the frequency and severity of ball-on-ball impacts is low, work hardening advances at a rate slower than the ball wear speed. Where the severity and frequency of ball-on-ball impacts is high, work hardening by plastic deformation can become severe with a great deal of energy absorbed as elastic compressive stressing at and near the ball surface. This can develop to an extent where the ball will split into halves with explosive force. A highly stressed grinding ball removed from a mill might remain intact for days or weeks before splitting. This phenomenon is a safety hazard.
	The severity of impact to which balls are exposed is dependent on specific mill operating parameters. Operating conditions that lead to ball - liner and ball - ball contact are: Increasing the rotational speed of the mill causes the charge to be thrown higher and further. Excessive speed causes the cascading portion of the charge to impact against the "hard and immovable" mill liners rather than the "soft and impact absorbent" toe of the charge. Increasing the percentage of balls in the charge increases the frequency of ball - liner and ball - ball impacts.
General hygiene considerations	Avoid contact with skin, eyes, and clothing. Avoid breathing dust / fume / gas / mist / vapours / spray. Wear suitable gloves and eye/face protection. Wash hands before breaks and immediately after handling the product. Regular cleaning of equipment, work area and clothing is recommended.
Conditions for safe storage, includ	ing any incompatibilities
Storage Conditions	Store in a cool, dry, well ventilated place. Keep container closed when not in use.
Incompatible materials	Acids. Alkalis.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters

Exposure Limits

No value assigned for this specific material by the New Zealand Workplace Health & Safety Authority. However, Workplace Exposure Standard(s) for constituent(s):

Manganese dust & compounds, as Mn: WES-TWA 0.2 mg/m³, Respirable dust WES-TWA 0.02 mg/m³, (oto) Manganese Fume, as Mn: WES-TWA 0.2 mg/m³, Respirable WES-TWA 0.02 mg/m³, (oto) Silicon: WES-TWA 10 mg/m³ Particulates not otherwise classified: 8hr WES-TWA 10 mg/m³ (inhalable dust) or 3 mg/m³ (respirable dust)

As published by the New Zealand Workplace Health & Safety Authority.

WES - TWA (Workplace Exposure Standard - Time Weighted Average) - The eight-hour, time-weighted average exposure standard is designed to protect the worker from the effects of long-term exposure.

(oto) - Toxic to the ear

These Workplace Exposure Standards are guides to be used in the control of occupational health hazards. All atmospheric

contamination should be kept to as low a level as is workable. These workplace exposure standards should not be used as fine dividing lines between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.

Appropriate engineering controls

Engineering controls Ensure adequate ventilation, especially in confined areas. Apply technical measures to comply with the occupational exposure limits.

If in the handling and application of this material, safe exposure levels could be exceeded, the use of engineering controls such as local exhaust ventilation must be considered and the results documented. If achieving safe exposure levels does not require engineering controls, then a detailed and documented risk assessment using the relevant Personal Protective Equipment (PPE) (refer to PPE section below) as a basis must be carried out to determine the minimum PPE requirements.

Individual protection measures, such as personal protective equipment

The selection of PPE is dependent on a detailed risk assessment. The risk assessment should consider the work situation, the physical form of the chemical, the handling methods, and environmental factors.

OVERALLS, SAFETY SHOES, SAFETY GLASSES, GLOVES, DUST MASK.

Eye/face protection	Glasses.
Hand protection	Impervious gloves.
Skin and body protection	Wear suitable protective clothing. Overalls. Boots.
Respiratory protection	If determined by a risk assessment an inhalation risk exists, wear a dust mask/respirator meeting the requirements of AS/NZS 1715 and AS/NZS 1716.
Environmental exposure controls	No information available.

9. PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

Physical state Appearance Color Odor Odor threshold

Property pH Melting point / freezing point Boiling point / boiling range Flash point Evaporation rate Flammability (solid, gas) Solid Steel balls No information available Odourless No information available

Remarks • Method None known

None known None known None known None known None known

Flammability Limit in Air Upper flammability or explosive limits	No data available	None known
Lower flammability or explosive limits	No data available	
Vapor pressure	No data available	None known
Vapor density	No data available	None known
Relative density	7.5-8.0	None known
Water solubility	Insoluble in water	None known
Solubility(ies)	No data available	None known
Partition coefficient	No data available	None known
Autoignition temperature	No data available	None known
Hyphen	>825°C	None known
Kinematic viscosity	No data available	None known
Dynamic viscosity	No data available	None known

Other information

10. STABILITY AND REACTIVITY

Reactivity	
Reactivity	No information available.
Chemical stability	
Stability	Stable under normal conditions.
Explosion data	
Sensitivity to mechanical impact	None.
Sensitivity to static discharge	None.
Possibility of hazardous reactions	
Hazardous polymerization	Hazardous polymerization does not occur.
Possibility of hazardous reactions	None under normal processing.
Conditions to avoid	
Conditions to avoid	Dust formation. Damp conditions.
Incompatible materials	
Incompatible materials	Acids. Alkalis.
Hazardous decomposition products	<u>.</u>

Hazardous decomposition products None known based on information supplied.

11. TOXICOLOGICAL INFORMATION

Acute toxicity

Information on likely routes of exposure

Product Information	No adverse health effects expected if the chemical is handled in accordance with this Safety Data Sheet and the chemical label. Symptoms or effects that may arise if the chemical is mishandled and overexposure occurs are:
Inhalation	May cause irritation.
Eye contact	May cause irritation. May cause physical irritation to the eyes.
Skin contact	May cause irritation.
Ingestion	May cause gastrointestinal discomfort if consumed in large amounts.
Symptoms	May cause physical irritation to the eyes.
Acute toxicity	
Numerical measures of toxicity	

Component Information

Chemical name	Oral LD50	Dermal LD50	Inhalation LC50
Iron	= 30 g/kg (Rat)	-	-
Silicon	= 3160 mg/kg (Rat)	-	-
Manganese	= 9 g/kg (Rat)	-	> 5.14 mg/L (Rat)4 h
Carbon	> 10000 mg/kg (Rat)	-	-

See section 16 for terms and abbreviations

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Skin corrosion/irritation	No information available.
Serious eye damage/eye irritation	No information available.
Respiratory or skin sensitization	No information available.
Germ cell mutagenicity	No information available.
Carcinogenicity	No information available.
Reproductive toxicity	No information available.
STOT - single exposure	No information available.
STOT - repeated exposure	No information available.
Aspiration hazard	No information available.

12. ECOLOGICAL INFORMATION

Ecotoxicity

Ecotoxicity	Avoid contaminating waterways
	, there eeritarin and g materina je

Terrestrial ecotoxicity There is no data for this product.

Chemical name	Algae/aquatic plants	Fish	Crustacea
Manganese	-	LC50: >3.6mg/L (96h, Oncorhynchus	-
-		mykiss)	

Persistence and degradability	
Persistence and degradability	No information available.
Bioaccumulative potential	
Bioaccumulation	No information available.
Mobility	
Mobility in soil	No information available.
Other advarage offects	
Other adverse effects	
Other adverse effects	No information available.

13. DISPOSAL CONSIDERATIONS

Waste treatment methods

Waste from residues/unused products	Dispose of in accordance with federal, state and local regulations.
Contaminated packaging	Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. TRANSPORT INFORMATION

ROAD AND RAIL TRANSPORT	Not classified as a Dangerous Good under NZS 5433 Transport of Dangerous Goods on Land; NON-DANGEROUS GOODS.
<u>IATA</u>	Not classified as Dangerous Goods by the criteria of the International Air Transport Association (IATA) Dangerous Goods Regulations for transport by air; NON-DANGEROUS GOODS.
IMDG_	Not classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea; NON-DANGEROUS GOODS.

15. REGULATORY INFORMATION

Safety, health and environmental regulations/legislation specific for the substance or mixture

New Zealand

National regulations	See section 8 for national exposure control parameters	
International Inventories		
NZIoC	All the constituents of this material are listed on the New Zealand Inventory of Chemicals or are exempt.	
TSCA	Contact supplier for inventory compliance status.	
DSL/NDSL	Contact supplier for inventory compliance status.	
EINECS/ELINCS	Contact supplier for inventory compliance status.	
ENCS	Contact supplier for inventory compliance status.	
IECSC	Contact supplier for inventory compliance status.	
KECL	Contact supplier for inventory compliance status.	
PICCS	Contact supplier for inventory compliance status.	
AIIC	All the constituents of this material are listed on the Australian Inventory of Industrial Chemicals or are exempt.	
Legend:	any of Chamicala	

NZIoC - New Zealand Inventory of Chemicals
TSCA - United States Toxic Substances Control Act Section 8(b) Inventory
DSL/NDSL - Canadian Domestic Substances List/Non-Domestic Substances List
EINECS/ELINCS - European Inventory of Existing Chemical Substances/European List of Notified Chemical Substances
ENCS - Japan Existing and New Chemical Substances
IECSC - China Inventory of Existing Chemical Substances
KECL - Korean Existing and Evaluated Chemical Substances
PICCS - Philippines Inventory of Chemicals and Chemical Substances
AllC- Australian Inventory of Industrial Chemicals

International Regulations

The Montreal Protocol on Substances that Deplete the Ozone Layer Not applicable

The Stockholm Convention on Persistent Organic Pollutants Not applicable

The Rotterdam Convention Not applicable

16. OTHER INFORMATION

Supplier Material Safety Data Sheet , not dated.

Prepared By	This Safety Data Sheet has been prepared by Ixom Operations Pty Ltd (Toxicology and SDS Services).
Issuing Date:	07-Dec-2023
Reason(s) For Issue:	Reissue of an obsolete SDS

Revision Note:

The symbol (*) in the margin of this SDS indicates that this line has been revised.

Disclaimer			

This SDS summarises to our best knowledge at the date of issue, the chemical health and safety hazards of the material and general guidance on how to safely handle the material in the workplace. Since Ixom Operations Pty Ltd cannot anticipate or control the conditions under which the product may be used, each user must, prior to usage, assess and control the risks arising from its use of the material.

If clarification or further information is needed, the user should contact their Ixom representative or Ixom Operations Pty Ltd at the contact details on page 1.

Ixom Operations Pty Ltd's responsibility for the material as sold is subject to the terms and conditions of sale, a copy of which is available upon request.
