SAFETY DATA SHEET

Revision Number 6

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER		
Product identifier		
Product Name	MONOETHYLENE GLYCOL	
Product Code(s)	000030116701	
Other means of identification		
CAS No.	107-21-1	
Synonyms	Ethylene glycol; MEG; 1,2-Ethanediol; 1,2-Dihydroxyethane.	
Recommended use of the chemical and restrictions on use		
Recommended use	Coolant and antifreeze; heat transfer agent; brake fluids; solvent; humectant.	
Uses advised against	No information available.	
Details of the supplier of the safety	data sheet	
Supplier Ixom Operations Pty Ltd (Incorporated in Australia) NZBN: 9429041465226 Address: 166 Totara Street Mt Maunganui South New Zealand Telephone Number: +64 9 368 2700 Facimile: +64 9 368 2710		
For further information, please cont	tact	
Contact Point	Product Safety Department	
Emergency telephone number		
Emergency Telephone	0 800 734 607 (ALL HOURS)	
Please ensure you refer to the limitations of this S	Safety Data Sheet as set out in the "Other Information" section at the end of this Data Sheet.	
2. HAZARDS IDENTIFICATION		
Not classified as a Dangerous Good under NZS 5433 Transport of Dangerous Goods on Land; NON-DANGEROUS GOODS.		
Classified as hazardous according to criteria in the Hazardous Substances (Hazard Classification) Notice 2020.		
GHS Classification		
SIGNAL WORD Danger		
Approval Number: HSR001534		

Acute toxicity - Oral	Category 4
Serious eye damage/eye irritation	Category 2

Specific target organ toxicity (repeated exposure)

Category 1

Label elements

Hazard statements

H302 - Harmful if swallowed H319 - Causes serious eye irritation H372 - Causes damage to organs through prolonged or repeated exposure

Precautionary Statements - Prevention

Do not breathe fume, gas, mist, vapours, spray Keep out of reach of children. Wash face, hands and any exposed skin thoroughly after handling Do not eat, drink or smoke when using this product Wear protective gloves / protective clothing / eye protection / face protection IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing If eye irritation persists: Get medical advice/attention IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell Rinse mouth **Precautionary Statements - Storage** No storage statements **Precautionary Statements - Disposal** Dispose of contents/container in accordance with local, regional, national, and international regulations as applicable

Other hazards which do not result in classification

3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance

Chemical name	CAS No.	Weight-%
Ethylene glycol	107-21-1	100%

4. FIRST AID MEASURES

Description of first aid measures

General advice	For advice, contact a Poisons Information Centre (e.g. phone Australia 13 11 26; New Zealand 0800 764 766) or a doctor. Show this safety data sheet to the doctor in attendance.
Emergency telephone number	Poisons Information Center, New Zealand: 0800 764 766 Poisons Information Center, Australia: 13 11 26
Inhalation	Remove to fresh air. If breathing is difficult, (trained personnel should) give oxygen. If breathing is irregular or stopped, administer artificial respiration. Get immediate medical advice/attention.
Eye contact	Rinse thoroughly with plenty of water for at least 15 minutes, lifting lower and upper eyelids. Consult a physician.

Skin contact	Wash with soap and water. Get medical attention if symptoms occur.
Ingestion	Clean mouth with water. Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Immediate medical attention is required.
Most important symptoms	and effects, both acute and delayed
Symptoms	Coughing and/ or wheezing. Difficulty in breathing. Dizziness.
Indication of any immediat	e medical attention and special treatment needed
Note to physicians	Treat symptomatically. Ethylene glycol can cause central nervous system depression and metabolic acidosis. Consider removal by gastric lavage. Blockade of the diacid/hydroxy acid metabolites may follow competitive inhibition of alcohol dehydrogenase with ethanol or 4-methyl pyrazole. Consider maintenance of a plasma ethanol level of 100 mg/dL to 150

5. FIRE FIGHTING MEASURES		
Suitable Extinguishing Media		
Suitable Extinguishing Media	Dry chemical, CO2, water spray or regular foam.	
Unsuitable extinguishing media	High volume water jet.	
Creative horough anising from the chemical		
Specific hazards arising from the chemical		
Specific hazards arising from the chemical	Combustible liquid.	
Hazardous combustion products	Carbon oxides.	
Special protective actions for fire-fighters		
Special protective equipment for fire-fighters	Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear. Use personal protection equipment.	

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

mg/dL.

Personal precautionsDo not breathe vapor or mist. Avoid contact with skin and eyes. Ensure adequate
ventilation. Evacuate personnel to safe areas. Stop leak if you can do it without risk.
Remove all sources of ignition. Do not touch or walk through spilled material. Do not eat,
drink or smoke when using this product. Use personal protective equipment as required.
Wash thoroughly after handling.For emergency respondersUse personal protection recommended in Section 8.Environmental precautionsSee Section 12 for additional Ecological Information.Methods and material for containment and cleaning up

Methods for containment	Prevent further leakage or spillage if safe to do so.
Methods for cleaning up	Take up with sand or other non-combustible absorbent material and place into containers for later disposal.
Precautions to prevent secondary hazards	

Clean contaminated objects and areas thoroughly observing environmental regulations.

7. HANDLING AND STORAGE

Precautions for safe handling

Prevention of secondary hazards

Advice on safe handling	Do not breathe vapor or mist. Avoid contact with skin and eyes. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Ensure adequate ventilation. Use personal protection equipment. Wash thoroughly after handling.	
Conditions for safe storage, including any incompatibilities		
Storage Conditions	Keep containers tightly closed in a dry, cool and well-ventilated place. Store away from foodstuffs and sources of heat or ignition. Keep container closed when not in use.	
Incompatible materials	Aldehydes. Alkali hydroxides. Aluminium. Chromyl chloride. Perchloric acid. Strong acids. Strong bases. Strong oxidizing agents.	

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters

Exposure Limits

Ethylene glycol (vapour & mist): Ceiling 50 ppm, 127 mg/m³

As published by the New Zealand Workplace Health & Safety Authority.

WES - Ceiling (Workplace Exposure Standard - Ceiling). A concentration that should not be exceeded during any part of the working day.

These Workplace Exposure Standards are guides to be used in the control of occupational health hazards. All atmospheric contamination should be kept to as low a level as is workable. These workplace exposure standards should not be used as fine dividing lines between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.

Appropriate engineering controls

Engineering controls Ventilation systems. Apply technical measures to comply with the occupational exposure limits.

If in the handling and application of this material, safe exposure levels could be exceeded, the use of engineering controls such as local exhaust ventilation must be considered and the results documented. If achieving safe exposure levels does not require engineering controls, then a detailed and documented risk assessment using the relevant Personal Protective Equipment (PPE) (refer to PPE section below) as a basis must be carried out to determine the minimum PPE requirements.

Individual protection measures, such as personal protective equipment

The selection of PPE is dependent on a detailed risk assessment. The risk assessment should consider the work situation, the physical form of the chemical, the handling methods, and environmental factors.

OVERALLS, SAFETY SHOES, SAFETY GLASSES, GLOVES, RESPIRATOR.

Eye/face protection	Goggles.	
Hand protection	Impervious gloves.	
Skin and body protection	Boots. Overalls. Impervious clothing.	
Respiratory protection	If determined by a risk assessment an inhalation risk exists, wear an organic vapour respirator meeting the requirements of AS/NZS 1715 and AS/NZS 1716.	
Environmental exposure controls	No information available.	

9. PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

internation on basic physical and chemical properties		
Physical state	Liquid	
Appearance	No information available.	
Color	Colourless	
Odor	Odourless	
Odor threshold	No information available.	
Property	Values	

Property_	Values	Remarks • Method
pH	5-8	None known
Melting point / freezing point	-12°C	None known
Boiling point / boiling range	198°C	None known
Flash point	111°C	CC (closed cup)
Evaporation rate	No data available	None known
Flammability (solid, gas)	No data available	None known
Flammability Limit in Air		None known
Upper flammability or explosive	12.8%	
limits		
Lower flammability or explosive	1.8%	
limits		
Vapor pressure	0.01 kPa @20°C	None known
Vapor density	2.14 (air=1)	None known
Relative density	1.1154 @20°C	None known
Water solubility	Miscible in water	None known
Solubility(ies)	No data available	None known
Partition coefficient	No data available	None known
Autoignition temperature	410°C	None known
Decomposition temperature	No data available	None known
Kinematic viscosity	No data available	None known
Dynamic viscosity	No data available	None known

Other information

10. STABILITY AND REACTIVITY	
Reactivity	
Reactivity	Reacts with strong oxidising agents.
Chemical stability	
Stability	Stable under normal conditions.
Explosion data	
Sensitivity to mechanical impact	None.
Sensitivity to static discharge	None.
Possibility of hazardous reactions	
Possibility of hazardous reactions	None under normal processing.
Conditions to avoid	
Conditions to avoid	Heat, flames and sparks. Humidity.
Incompatible materials	
Incompatible materials	Aldehydes. Alkali hydroxides. Aluminium. Chromyl chloride. Perchloric acid. Strong acids. Strong bases. Strong oxidizing agents.

Hazardous decomposition products

Hazardous decomposition products Carbon oxides.

11. TOXICOLOGICAL INFORMATION

Acute toxicity

Information on likely routes of exposure

Product Information	No adverse health effects expected if the chemical is handled in accordance with this Safety Data Sheet and the chemical label. Symptoms or effects that may arise if the chemical is mishandled and overexposure occurs are:
Inhalation	May cause irritation.
Eye contact	Causes serious eye irritation.
Skin contact	May cause irritation. Will have a degreasing action on the skin. Can be absorbed through the skin with resultant adverse effects. Effects can include those described for 'Ingestion'.
Ingestion	Harmful if swallowed. Initial symptoms following a large dose (>100 mL) are those of alcohol intoxication progressing to vomiting, headache, stupor, convulsions and unconsciousness. Respiratory system involvement may occur 12 - 24 hours after ingestion. Symptoms may include hyperventilation and rapid shallow breathing. Death may occur from respiratory failure or pulmonary oedema.
Symptoms	Coughing and/ or wheezing. Difficulty in breathing. Dizziness.

Acute toxicity

Numerical measures of toxicity

Chemical name	Oral LD50	Dermal LD50	Inhalation LC50
Ethylene glycol	= 1700 mg/kg (Rat)	= 10600 mg/kg (Rat) = 9530	-
		μL/kg (Rabbit)	

See section 16 for terms and abbreviations

Delayed and immediate effects as well as chronic effects from short and long-term exposure
--

Skin corrosion/irritation	No information available.
Serious eye damage/eye irritation	Causes serious eye irritation.
Respiratory or skin sensitization	No information available.
Germ cell mutagenicity	No information available.
Carcinogenicity	No information available.
Reproductive toxicity	No information available.
STOT - single exposure	No information available.
STOT - single exposure	
STOT - repeated exposure	Causes damage to organs through prolonged or repeated exposure.
Aspiration hazard	No information available.
Chronic effects:	Estimated minimum lethal dose (human) following ingestion of ethylene glycol is thought to be 1.4ml/kg. High doses of ethylene glycol in rats and mice have resulted in reproductive and developmental toxicity following exposure by the oral and inhalation (respirable aerosol) routes. These particular data sets are not considered relevant to normal industrial use but do emphasise the need for care in handling. Data from animal and human studies to date do not provide evidence that exposure to ethylene glycol has mutagenic or carcinogenic effects.

12. ECOLOGICAL INFORMATION

Ecotoxicity

Ecotoxicity

Keep out of waterways.

Terrestrial ecotoxicity

There is no data for this product.

Chemical name	Algae/aquatic plants	Fish	Crustacea
Ethylene glycol	EC50: 6500 - 13000mg/L (96h, Pseudokirchneriella subcapitata)	LC50: =41000mg/L (96h, Oncorhynchus mykiss) LC50: 14 - 18mL/L (96h, Oncorhynchus mykiss) LC50: =27540mg/L (96h, Lepomis macrochirus) LC50: =40761mg/L (96h, Oncorhynchus mykiss) LC50: 40000 - 60000mg/L (96h, Pimephales promelas) LC50: =16000mg/L (96h, Poecilia	EC50: =46300mg/L (48h, Daphnia magna)

		reticulata)		
Persistence and degradability				
Persistence and degradability	No information available.			
Bioaccumulative potential				
Bioaccumulation	This chemical shows a low	This chemical shows a low bioaccumulation potential.		
Mobility				
Mobility in soil	No information available.			
Chemic	al name	name Partition coefficient		
Ethylen	e glycol	-1.36		
Other adverse effects				
Other adverse effects	No information available.	No information available.		
13. DISPOSAL CONSIDERATIONS				
Waste treatment methods				
Waste from residues/unused products	Substances (Disposal) No and Revocations) Notice 2 characteristics or composi	Dispose of product in packaging/container in a way that is consistent with the Hazardous Substances (Disposal) Notice 2017 and the Act, and Hazardous Substances (Amendments and Revocations) Notice 2020. Treat the chemical using a method that changes the characteristics or composition of the chemical so that the chemical is no longer a hazardous chemical; or export the chemical from New Zealand as waste.		
Contaminated packaging		Empty containers pose a potential fire and explosion hazard. Do not cut, puncture or weld containers. Empty containers should be taken to an approved waste handling site for recycling or disposal.		
14. TRANSPORT INFOR	RMATION			
ROAD AND RAIL TRANSPORT	_ Not classified as a Danger Land; NON-DANGEROUS	rous Good under NZS 5433 Transport of Dangerous Goods on S GOODS.		
IATA_		us Goods by the criteria of the International Air Transport rous Goods Regulations for transport by air; DS.		
IMDG_		us Goods by the criteria of the International Maritime Dangerous) for transport by sea; NON-DANGEROUS GOODS.		

15. REGULATORY INFORMATION

Safety, health and environmental regulations/legislation specific for the substance or mixture

New Zealand

L (Short Term Exposure Limit)

designation

National regulations
